CHAOS, SOLITONS and FRACTALS
applications in science and engineering

VOLUME 1 CONTENTS

VOLUME 1 NUMBER 1 **1991**

M. S. El Naschie	1	Editorial
I. Prigogine, T. Y. Petrosky, H. H. Hasegawa and S. Tasaki	3	Integrability and chaos in classical and quantum mechanics
G. Nicolis, S. Martínez and E. Tirapegui	25	Finite coarse-graining and Chapman-Kolmogorov equation in conservative dynamical systems
G. Rega, F. Benedettini and A. Salvatori	39	Periodic and chaotic motions of an unsymmetrical oscillator in nonlinear structural dynamics
K. Konno, M. Mituhashi and Y. H. Ichikawa	55	Soliton on thin vortex filament
T. Kapitaniak	67	On strange nonchaotic attractors and their dimensions
B. V. Chirikov	79	Patterns in chaos
	I	Sample layout for camera-ready copy submission

VOLUME 1 NUMBER 2 **1991**

M. Klein, G. Baier and O.E. Rössler	105	From N-tori to hyperchaos
A. V. Panfilov and B. N. Vasiev	119	The drift of a vortex in an inhomogeneous system of two coupled fibers
G. Casati, I. Guarneri and D. L. Shepelyansky	131	Two-frequency excitation of hydrogen atom
S. P. Dawson and C. Grebogi	137	Cubic maps as models of two-dimensional anti-monotonicity
A. S. Davydov	145	Nonlinear bisoliton model of high-temperature superconductivity
A. Clausse and R. T. Lahey, Jr	167	The analysis of periodic and strange attractors during density-wave oscillations in boiling flows

Xiaohua Tong and **F. P. J. Rimrott**	179	Numerical studies on chaotic planar motion of satellites in an elliptic orbit
A. Jeffrey and **M. N. B. Mohamad**	187	Travelling wave solutions to a higher order KdV equation
S. P. Blythe and **T. K. Stokes**	195	Evolutionary dynamics: variable attractor or infinite transient?
	I	Sample layout for camera-ready copy submission

VOLUME 1 NUMBER 3 **1991**

Y. Ueda	199	Survey of regular and chaotic phenomena in the forced Duffing oscillator
M. Szydłowski, J. Szczęsny and **M. Biesiada**	233	A criterion for local instability of a geodesic flow from the Jacobi equation in Fermi basis
Wei-Mou Zheng	243	Symbolic dynamics for the Lozi map
M. Wadati, T. Yajima and **T. Iizuka**	249	The theory and applictions of the unstable nonlinear Schrödinger equation
P. Stelter and **T. Pfingsten**	273	Calculation of the fractal dimension via the correlation integral
Bomin Xie	281	A quantum mechanical problem involving many interacting solitons and its classical chaotic limit
	I	Sample layout for camera-ready copy submission

VOLUME 1 NUMBER 4 **1991**

F. Teymour and **W. H. Ray**	295	Chaos, intermittency and hysteresis in the dynamic model of a polymerization reactor
Zhang Peng	317	A perturbed soliton cellular automata and perturbed soliton evolution
J. Brindley and **T. Kapitaniak**	323	Existence and characterization of strange nonchaotic attractors in nonlinear systems
G. I. Dykman, P. S. Landa and **Y. I. Neymark**	339	Synchronizing the chaotic oscillations by external force

A. P. Kuznetsov, S. P. Kuznetsov and I. R. Sataev	355	Period doubling system under fractal signal: bifurcation in the renormalization group equation
A. R. Chowdhury and K. Chowdhury	369	On the Hopf bifurcation in a coupled nonlinear map
G. Böhm	375	Protein folding and deterministic chaos: limits of protein folding simulations and calculations
B. A. Malomed, N. Sasa and J. Satsuma	383	Evolution of a damped soliton in a higher-order nonlinear Schrödinger equation
W.-M. Yang	389	On the largest Lyapunov exponent for coupled surjective map lattice with weak diffusive coupling
	I	Sample layout for camera-ready copy submission

VOLUME 1 NUMBER 5 **1991**

V. K. Horváth and H. J. Herrmann	395	The fractal dimension of stress corrosion cracks
U. P. Shinde, A. Sharma and B. D. Kulkarni	401	Can mobile shapes of fractals cause rate enhancement?
E. B. Bartlett	413	Analysis of chaotic population dynamics using artificial neural networks
K. L. Bekyarov and C. I. Christov	423	Fourier-Galerkin numerical technique for solitary waves of fifth order Korteweg-De Vries equation
M. Cserzö and T. Vicsek	431	Self-affine fractal analysis of protein structures
E. Kreuzer, M. Kleczka and S. Schaub	439	Chaotic dynamics of a simple oscillator - a pictorial introduction
T. Puu	457	Chaos in business cycles
K. Nishimura and V. Kunapongkul	475	Economic growth and fertility rate cycles
M. S. El Naschie	485	Quantum mechanics and the possibility of a Cantorian space-time
	489	Erratum
	I	Sample layout for camera-ready copy submission

VOLUME 1 NUMBER 6 1991

F. Bontempi, F. Casciati and **L. Faravelli**	491	Chaotic motion versus stochastic excitation
S. Ichinose	501	Soliton excitations in alpha-helical protein structures
R. López-Ruiz and **C. Pérez-García**	511	Dynamics of maps with a global multiplicative coupling
R.J. Slobodrian, M. Cossette, B. Larouche, L. Potvin and **C. Rioux**	529	Fractal aggregates in simulated reduced gravity
M. Nakagawa and **K. Kobayashi**	535	Diffusion-limited aggregation with a local particle drift
R. Doerner, B. Hübinger, W. Martienssen, S. Grossmann and **S. Thomae**	553	Predictability portraits for chaotic motions
T. Puu	573	Chaos in duopoly pricing
R. Aris	583	Diffusion and reaction in a Mandelbrot lung
P. P. Banerjee and **M. R. Chatterjee**	595	Implicit solitary wave solutions of the generalized magma equation
	I	Volume 1 Title Page, Volume Contents and Author Index
	IX	Sample layout for camera-ready copy submission
